

High Stakes at Ashfield Flats...

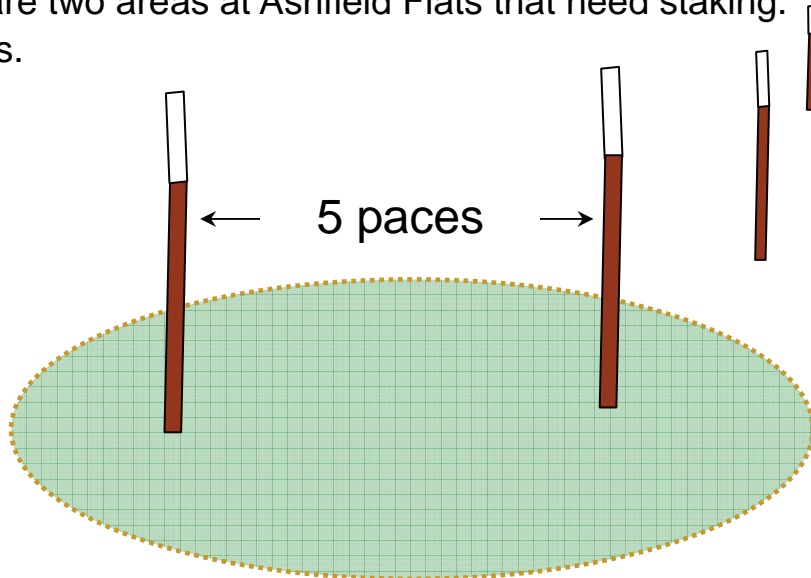

# STAKEOUT:

🌀 Sunday 29-Aug-10 ❖ 9:00 am 🌀

**BPG is watching out for this and prior year's native revegetation.**

As you may already know, BPG continues to improve their already very successful planting program. Now we are staking only around the perimeter of the planting areas to keep out the mowers instead of a stake at each plant. There are two areas at Ashfield Flats that need staking. Should take an hour or two tops.

#### WHAT to BRING:

- Hat
- Gloves
- Mozzie repellent
- Wellies  
(if it has rained)

#### BPG will have on site:

- Stakes
- Stake drivers

(No hammer required)

On the morning at Ashfield Flats, BPG will be:

- Tidying up any existing stakes that need it.
- Staking the perimeter of the posthole trial/EHPS planted area.
- Staking the perimeter of the natural regeneration test area.

*Please come and contribute!*

🌀 **Ashfield Flats is at the End of West Road, Sandy Beach Reserve** 🌀
